

Reasons To Decide on Security Shutters

Keeps cold and heat out

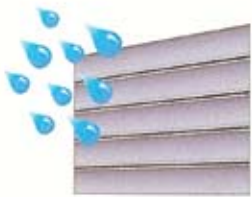

Increase burglary protection

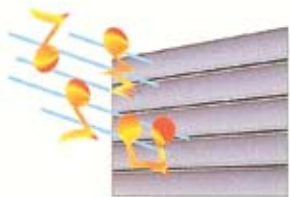

Screens interior from view

Keeps the sun out

Keeps the weather out

Keeps the noise out

1. Perfect for screening the interior of your house from view

To give you that utter sense of privacy in your own home. Adjust your level of privacy by raising/lowering your shutters.

2. Best protection against the weather

During rain, snow, hail, wind. The aluminium shutters also protect very effectively against solar radiation. The rooms remains comfortably shadowy and cool. Furniture and floor coverings are protected against bleaching.

Wooden windows are shielded in an optimal way.

3. Noise insulation with closed roller shutters

Roller shutters made of aluminium with noise-reducing and CFC-free insulating foaming reduce the noise level considerably. You sleep better, whether at night or at daytime.

4. Saving energy

With a front mounted roller shutter by Countrywide primary fuel consumption will be reduced in comparison to a roller shutter with a lintel box, because there is no area of heat loss between the roller shutter unit and the inside of the room. Between window and roller shutter curtain is formed a highly insulating cushion of air forms. The insulation value of a window with heat insulating glass can be optimised by up to 20% with a front-mounted roller shutter.

5. Safety retrofit kit at extra charge: (preventative) protection against burglars.

The brand name roller shutters by Countrywide will pose considerable problems to hoodlums. Roller shutter systems made of aluminium are simply safer. An individual safety package with reinforced end slat, safety guide channels and anti-push-up lock protects your home additionally. You get a factory tested system in this safety package at a very attractive price.

7. Pretend to be present by means of a timer

A programmable timer open and closes your roller shutters at any time you wish – also in irregular time spans. So your home looks inhabited. Another burglar deterrent.

8. Comfortable operation with radio control

A radio remote control for the roller shutters is the most comfortable thing you can imagine. No control leads either surface-mounted or flush-mounted are needed. This means for you minimal installation works without damaging the wall. With a light sensor combined with an automatic control unit the roller shutters can be, depending on incidence of light, open or closed automatically.
